

## HGS Gravity Shutter

Hydor's HGS Gravity Shutter is manufactured in galvanized steel with a high protection against corrosion.

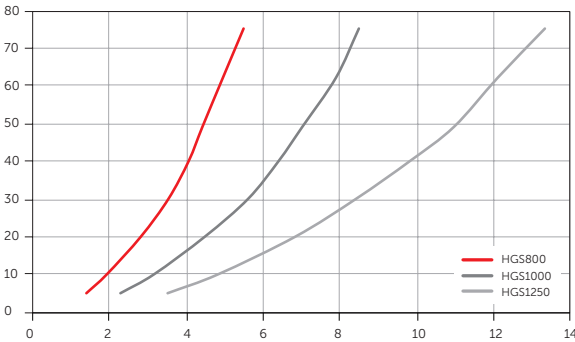

The standard product is a gravity shutter which opens with the airflow of the fan due to the lightweight, perfectly balanced shutter blades which are linked to one another.

Models with codes ending /MOT are supplied with an actuator for controlled shutter operation.

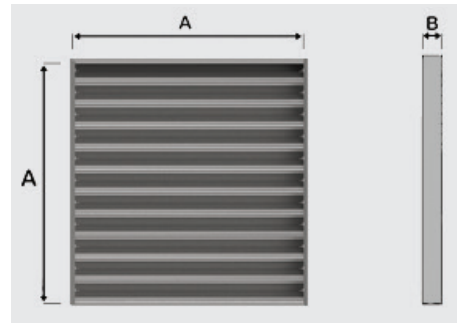

Article No.	Model	Airflow m <sup>3</sup> /s @Static Pressure Pa.								
		5	10	20	30	40	49	62	75
