

Lightsaber

Introducing Hydor's new tubular, dimmable and fluorescent light; the HFTD Lightsaber.

The unit can be mounted or suspended vertically or horizontally and has a built-in diffuser as standard, to prevent shadows and give a more even light output. The digital control ensures that the light can be dimmed to 1% of full brilliance, whilst the installation and wiring is simplified by not requiring a separate screened control cable.

The light is ideal for the poultry market and suitable for all operations, whilst reducing power usage to give the same light output as conventional units.

| Product | Watts | Diameter | Total Length |
|---------|-------|----------|-----------------|
| HFTD4 | 28 | 25 | 1700 (4ft tube) |
| HFTD5 | 35 | 25 | 2000 (5ft tube) |

features and benefits

- Suspended vertically or horizontally
- Pig tails for easy removal of fitting for cleaning and maintenance
- Easy installation and wiring
- Acrylic Outer Tube and End Caps
- Dimming control from 100% to 1%
- 1500mm T5 Tubes are supplied as standard
- Guaranteed for 20,000 hours operation
- Reduced power consumption compared to conventional units
