Rotem Communicator

The Rotem Communicator is a state-of-the-art Alarm and Communication center for the mode farm. The unit uses the latest and most advanced communication methods to assist farmers in the performance of their demanding day-to-day tasks.

features and benefits

- Numerous poultry house control units can be linked together and communicated through the Communicator to a PC.

- The Rotem Communicator keeps the farmer updated and informed. It is now possible to connect to the farm via phone lines, DSL, cellular networks, cable modem and satellite, 24 hours a day. The Communicator can send a message by SMS (Short Message Service), and/or dial-up to notify the farmer about any problem whilst also delivering messages to several locations using it's built in voice card, and/or as e-mail.

- The unit offers a user-friendly interface with a full alphanumeric keypad, 20 character X 4 line LCD and LED lighted indicators. The user can customize voice messages according to personal preference.Advanced easy to use software for the computer is included.

PC computer control

To fully exploit the potential of Rotem Controllers, the option of operating and controlling a poultry house from a computer is possible.

Numerous poultry house control units can be linked together and communicated through the Rotem Communicator to a PC. The PC can either be located close to the controllers, or some distance away utilising telephone lines or line of sight radio signals. Advanced easy to use software for the computer is included.

The Communicator is also an advanced alarm message communication device. See table for detailed description of the controllers capabilities.
